COASTAL ENGINEERING

Contents of volume 34

Research Papers

Current-induced scour along a breakwater at Ventura Harbor, CA—experimental study
S.A. Hughes and B.R. Schwichtenberg 1

An experimental investigation of the role of atmospheric stability in wind wave growth
I.R. Young 23

Internal generation of waves for time-dependent mild-slope equations
C. Lee and K.D. Suh 35

Bed-load transport for steady flows and unsteady oscillatory flows
J.S. Ribberink 59

Evaluation of methods for numerical simulation of wetting and drying in shallow water flow models
A. Balzano 83

Wave-induced liquefaction and flow of subaqueous mud layers
T. van Kessel and C. Kranenburg 109

Tidal flow modelling using a direct minimisation method
G.J.M. Copeland and G.L.S. Bayne 129

Discussions

Discussion of 'Note on a nonlinearity parameter of surface waves' by S. Beji
J.T. Kirby 163

Author's closure to J.T. Kirby's discussion 'Note on a nonlinearity parameter of surface waves'
S. Beji 169

Research Papers

Cross-shore hydrodynamics within an unsaturated surf zone
T.E. Baldock, P. Holmes, S. Bunker and P. Van Weert 173

The motion of large bottom particles (cobbles) in a wave-induced oscillatory flow
S.I. Voropayev, J. Roney, D.L. Boyer, H.J.S. Fernando and W.N. Houston 197

Characteristics of quadrant and octant advection schemes in wave models
L. Cavaleri and M. Sclavo 221

Hyperbolic mild-slope equations extended to account for rapidly varying topography
C. Lee, W.S. Park, Y.-S. Cho and K.D. Suh 243

A note on the horizontal momentum exchange in combined waves and current
R. Deigaard, A. Okayasu and J.H. Frederiksen 259

A Quasi-3D phase-resolving hydrodynamic and sediment transport model
K.A. Rakha 277

Addendum

Addendum to book review by J.W. Kamphuis on "Hydrodynamics around Cylindrical Structures" (Coastal Eng. 33 (1998) 69)
B.M. Sumer and J. Fredsøe 313

Contents of volume 34 315
